The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/533,454	Applicant(s) MUKAIDE, TAIHEI	
	Examiner Zinna Northington Davis	Art Unit 1625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-6 are pending.
2. In the response filed March 6, 2008, Applicants have elected the compound wherein M is iridium (Ir); A is phenyl; and B is isoquinoline. The compound is depicted below:

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
4. The examined subject matter is as follows: a chemical compound wherein M is iridium (Ir); A is phenyl; and B is isoquinoline.
5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

6. Claims 1, 2, and 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. At claims 1, 2, and 4-6, It is suggested that the term “general” should be deleted. The chemical compound is depicted.

B. At claim 6, It is suggested that the phrase “characterized by” should be amended to read as “wherein”.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Igarashi et al (Reference A, cited by the Examiner).

The instantly claimed compound is disclosed. At page 11, see the compound of formula (I-8). The compound is depicted below:

. At page 25, 1st column, paragraph[0129], see the process for preparation.

Art Unit: 1625

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Igarashi et al (Reference A, cited by the Examiner).

In addition to the specific iridium compounds anticipated by Igarashi et al. as set forth in the rejection under 35 U.S.C. 102(e), Igarashi et al. suggest various other compounds within the scope of the present claims. It would have been prima facie obvious to one of ordinary skill in the art at the time of the invention to make other compounds within the scope of Igarashi's generic formula and similar to the specific compounds disclosed by Igarashi et al. with the expectation that similar compounds would have similar properties and could be used for the purposes of the prior art. At page 9, see the compounds of formula 19 which is depicted below:

11. Reference B is cited to show the state of the art.

Art Unit: 1625

12. The Information Disclosure Statements filed May 2, 2005, April 12, 2006, April 25, 2006, and July 13, 2007 have been considered.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zinna Northington Davis whose telephone number is 571-272-0682.

14. The fax phone numbers for the organization where this application or proceeding is assigned are (571) 273-8300 for regular communications.

15. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
